

Air Safety Consultant and Accident Investigator

Academic Qualifications

- **Master of Aeronautical Science**
- **Bachelor of Science in Engineering Physics**
- **Associates of Applied Science in Manufacturing Engineering Technology**
- **Extension Diploma Applied General Metallurgy**
- **USAF Intelligence School**
- **Trained Accident Reconstructionist and Failure Analyst (19+ years)**
- **Aviation Instructor at Lewis University**
- **US DOT Certified Aviation Safety Investigator**

Flight and Maintenance Qualifications

- **National Test Pilot School:** Technical Pilot Course, Upset Prevention and Recovery Course, Flight Test Performance and Flying Qualities for ICAO Accident Investigations Course
- **Piloted / Instructed in 64 Different Aircraft:** 26+ years, Turbojets to Gliders
- **FAA Commercial Pilot:** Instrument, SEL, SES, MEL, Glider
- **FAA Certified Flight Instructor:** CFI-A, MEI, AGI
- **FAA Flight Endorsements:** Complex, High Performance, Tailwheel
- **FAA Aeromedical Institute (CAMI):** Specialized High-Altitude Physiological Education & Training
- **FAA/EASA Approved Systems Ground School:** Boeing B737-800 NG
- **FAA Airframe and Power Plant (A&P) Mechanic:** 26+ years as an Aircraft Mechanic
- **FAA Inspection Authorization (IA)**
- **FAA Designated Mechanic Examiner (DME)**
- **Safety Management System (SMS) Training**

Expertise: Piloting, Maintenance, Material Science, Accident Reconstruction

Aircraft Design and Operation
Aircraft Performance
Avionics & Autopilots
Basic & Advanced Pilot Training
Turbine & Reciprocating Engines
Major Repairs & Alterations
Human Factors
TAA Aircraft
FAA Regulations & Certification

Wreckage Reconstruction
In-Flight Break-Ups
Mid-Air Collisions
Flight Path Reconstruction
Crashworthiness
Loss of Control
System Failures
In-Flight Fires
Cockpit Automation

Mechanical Testing
Material Compatibility
Patent Infringement
Material Failure Analysis
Composite Materials
Mechanical Fasteners
Tribology & Wear Testing
Corrosion
Lubricants, Greases, & Fuels

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

Education Degrees and Certificates

- **Master of Aeronautical Science**,¹ Embry-Riddle Aeronautical University, 2009
- **Bachelor of Science in Engineering Physics**,² Benedictine University-IL Institute of Technology, 1997
- **Associates of Applied Science in Manufacturing Engineering Technology**,³ College of DuPage, 2008
- **Extension Diploma, Applied General Metallurgy**,⁴ Materials Engineering Institute, 2010
- **Certificate, Program Management**, DePaul University, 2001

FAA Ratings Airman & Mechanic Certificates & Designations

Professional Certification and Licenses

- **U.S. Department of Transportation (DOT) Certified Aviation Safety Investigator**, Certificate # 13
- **Illinois Licensed Private Detective**, License # 115002150

Military Training and Education

- **USAF Basic Military Training**, 1994
- **USAF Intelligence School: Collection, Analysis, and Dissemination of Classified Information**, 1994
- **USAF Special Operations School: Asian-Pacific: Cultural, Sociological, and Political Studies**, 1995
- **USAF Non-Commissioned Officer School: Leadership and Management Training**, 1997-2000
- **USAF Combat Survival School: Survival (Land and Water), Evasion, Resistance, and Escape**, 1998

¹ Aeronautics is the Science that deals with flight through the air. This includes the study, design, and manufacturing of flight capable machines, and the techniques of operating aircraft and rockets in the atmosphere. Graduate studies included aircraft and spacecraft design, advanced aerodynamics, aircraft performance, aircraft certification, aviation safety, aircraft maintenance, Human Factors, meteorology, and other topics.

² Engineering Physics is the study of the combined disciplines of engineering, physics, and math. Undergraduate studies included physics, chemistry, math, material science, strength of materials, engineering statics and dynamics, thermodynamics, fluid dynamics, electronics, and other topics.

³ Manufacturing Engineering Technology is a discipline of science that deals with different manufacturing practices and includes the research, design and development of systems, processes, machines, tools and equipment.

⁴ Applied General Metallurgy is a comprehensive understanding of the properties of metals and alloys, as well as metal processes and techniques in manufacturing, including failure analysis and fracture analysis

Training

Accident Investigation, Failure Analysis, & Safety

- **Accident Investigator (PERC) at Private Detective Agency**, Packer Engineering, 2000-2004
- **Vehicular Accident Reconstruction and Investigation Course**, Northwestern University, 2000
- **Aircraft Accident Investigation Course**, University of Southern California (USC), 2001
- **Principles of Failure Analysis Course**, Materials Engineering Institute (ASM International), 2003
- **Advanced Aircraft Accident Investigations Course**, Embry Riddle Aeronautical University, 2008
- **Mechanical Testing of Metals Course**, Materials Engineering Institute (ASM International), 2009
- **Reliability and 1309 Design Analysis for Aircraft Systems**, University of Kansas, 2013
- **Certificated Fire, Arson, and Explosion Investigation Training**, NAFI, 2015
- **Safety Management Systems Course**, Embry Riddle Aeronautical University, 2017
- **Safety Management Systems for Aviation Professionals**, Flight Safety International, 2017
- **Advanced Aircraft Accident Investigation Course**, U.S. Department of Transportation (DOT), Transportation Safety Institute, National Aircraft Accident Investigation School, 2019
- **Unmanned Aircraft System Accident Investigation Training**, U.S. Department of Transportation (DOT), Transportation Safety Institute, National Aircraft Accident Investigation School, 2019
- **Composite Aircraft Accident Investigation Training**, U.S. Department of Transportation (DOT), Transportation Safety Institute, National Aircraft Accident Investigation School, 2019
- **Human Factors in Accident Investigation Course**, U.S. Department of Transportation (DOT), Transportation Safety Institute, National Aircraft Accident Investigation School, 2019
- **Experimental Aircraft Accident Investigation Course**, U.S. Department of Transportation (DOT), Transportation Safety Institute, National Aircraft Accident Investigation School, 2019
- **Advanced Commercial Aircraft Accident Investigation Course**, U.S. Department of Transportation (DOT), Transportation Safety Institute, National Aircraft Accident Investigation School, 2019

Training

Piloting

National Test Pilot School (NTPS), Mojave, CA:

- **Technical Pilot Course**,⁵ 2017
- **Upset Prevention and Recovery Training**, 2017
- **Flight Test Performance and Flying Qualities for ICAO Accident Investigations**, 2018
- **Co-Developed with NTPS a Test Pilot Training Course and Curriculum Specific for Aircraft Accident Investigators in accordance with ICAO Standards**, 2017-2018

⁵ Test Pilot Training included aircraft certification, advanced aerodynamics and aircraft performance, aircraft stability and control, aircraft flying and handling qualities, stalls, spins, upset recovery, aeroelasticity and flutter, Pilot-Induced-Oscillation (PIO) theory, and other topics for both single and multi-engine aircraft.

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

Training

Piloting (continued)

Embry Riddle Aeronautical University, Advanced Pilot Training Specialty Courses:

- Jet Upset Training, 2017
- Fatigue Risk Management, 2017
- Contaminated Runway Operations, 2017
- CFIT- Controlled Flight into Terrain, 2017
- Weather and Meteorology, 2017
- Thunderstorm Avoidance, 2017
- Wind Shear Avoidance, 2017
- Cold Weather Winter Operations, 2017
- Hot Weather Operations, 2017
- 4 Engine Performance, 2018
- FAA/EASA Approved Systems Ground School: Boeing B737-800 NG

Federal Aviation Administration Civil Aerospace Medical Institute (CAMI) Training:

- Specialized High-Altitude Physiological Education & Training, 2001
- Spatial Disorientation Simulator Training, 2001
- Post-Crash Survival & Cabin Evacuation Training, 2001

Flight Safety International Flight Training:

- Single Pilot Resource Management, and LOST in C208B, 2018
- Human Factors and CRM General Concepts for Pilots, 2018
- High Altitude Training, 2018

Other Specialized Flight Training:

- PA-31 Navajo Simulator Training, Advanced Weather Avoidance, & Single Pilot IFR, RTC, 2004
- Precipitation and Icing Course, AOPA Air Safety Foundation, 2009
- Runway Safety Course, AOPA Air Safety Foundation, 2010
- GPS for IFR Operations Course, AOPA Air Safety Foundation, 2011
- Garmin G1000 Refresher Training, Glass Simulator Center, 2013
- PC-12 NG Simulator Training, SIMCOM Aviation Training, 2013
- Cessna CJ3+ Simulator Training, PROFLIGHT Simulator Training, 2013
- Agricultural Pilot Flight Training, Eagles Vista, 2014
- Piper PA-46 Pilot Flight Training, RWR Pilot Training, 2014
- Cirrus Factory Transition Training -SR-20, 2015
- Cirrus Factory Simulator Training -SR-22, 2015
- Boeing KC-135R Simulator Training, USAF-ANG 128th Air Refueling Wing, 2015

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

- **Bush and Mountain Flying**, Bush Air-Safety Training, 2015
- **Managing Wildlife Strikes**, Bird Strikes Committee USA-Safety Training, 2015
- **Flight Instructor Renewal Course**, American Flyers 2001-2015
- **King Air 200 Simulator Training**, RTC Simulators, 2016
- **Western Michigan University-Cirrus SR20 Simulator**, 2016
- **Mountain Flying Course**, AOPA Air Safety Foundation, 2018

Piloting Commercial Pilot Experience

2000 to Present

Accident Test Pilot- Performed Test Flights in Support of Aircraft Accident Investigations. Evaluated Aircraft Performance, Aircraft Stability & Control, Aircraft Flying & Handling Qualities, Stalls, Spins, Upset Recovery, Loss-of Control, Cockpit Design and Visibility, System Malfunctions, and other topics in accordance with the ICAO Manual for Aircraft Accident Investigations.

1999 to Present

Flight Instructor- Performed Human Factors Based Flight Reviews. Evaluated Pilot Performance Utilizing Training Scenarios Based on Accident Data Involving Aviation Human Factors. Knowledgeable in areas of expertise to include aerodynamics, aircraft performance, stalls, spins, flight planning, piloting techniques, the Fundamental of Instructing (FOI), Human Factors, meteorology, the National Airspace System, risk management, Federal Aviation Regulations, collision avoidance, and other topics.

Piloting Aircraft & Simulators Flown

Aircraft:

Aviat: A-1A; **Auster:**-5J4; **Beechcraft:** A-36, F-33, BE-76, BE-90, C24, V-35; **Boeing:** PT-17; **Cessna:** 140, 150, A150, 152, 170, 170 (180HP), 172, 172RG, 175, 177, 180 Float, 182, 182RG, 185, 206, 310, 337, 414; **Cirrus Aircraft:** SR20, SR22; **Commander Aircraft:** 115; **Diamond Aircraft:** DA-20, DA-40, DA-42, HK36TC; **ERCO** **Ercoupe:** 415C; **Experimental:** LongEZ, Glasair III, RV-6A, Breezy; **Ford:** AT-4 Tri-Motor; **Grumman:** AA-5B; **Grobe:** Motorglider; **Lake:** LA-4; **Piper:** J-3, PA23-150, PA23-180, PA23-235, PA25, PA28-150, PA28-160, PA28-161, PA28-180, PA28-181, PA28-235, PA-30B, PA32R-301, PA34-200T, PA38, PA46-350; **Mooney:** M20J; **North American:** T-6, T-28, Sabreliner 60A; **Pilatus:** PC-12; **Ryan Navion:** NAV-4; **Socata:** Rallye 100; **Stinson:** -108; **YAK:** -52W; **ZLIN:** Z-526F.

FAA and Military Approved Flight Simulators:

Boeing: KC-135R; **Beechcraft:** B58, BE-90, BE-200; **Cessna:** C208B, CE-560, CE-650, CJ3+, CE-500; **Cirrus** SR20, SR22; **Pilatus** PC-9, PC-12NG; **Piper** PA-31; **Saab** 340D.

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

Training Aircraft Maintenance:

- **Textron-Lycoming Aircraft Engines, Factory Powerplant Education & Training, 2002**
- **Teledyne-Continental Aircraft Motors, Factory Powerplant Education & Training, 2002**
- **Advanced Composite Material Fabrication and Repair Training, Flight Safety International, 2002**
- **Williams International, Factory FJ44/33 Turbine Engine Education and Training, 2007**
- **Aging Aircraft Course, AOPA Air Safety Foundation, 2008**
- **Pratt & Whitney PT6A Series Familiarization Training, Flight Safety International, 2013**
- **Attended Factory Sponsored Seminars on FADEC Systems, Propellers, Governors, Alternators, Starters, Magnetos, Fuel Injection Systems, Brakes, Fuel Cells, & Vacuum Pumps, 1994-2017**
- **Auto Engine Conversions for Experimental Aircraft, EAA Maintenance Training, 2015**
- **FAA Inspection Authorization Renewal Training, Lewis University & DPA FSDO, 2001-2019**
- **FAA Designee Standardization Branch DME Initial and Renewal Training, FAA, 2015-2018**

Training Technical (Other)

- **Metal Castings Technologies Course, Cast Metals Institute-American Foundry Society, 2003**
- **Managing Complex Product Development Programs Course, MIT, 2003**
- **Vehicle Dynamics and Control, Skip Barber Racing School, 2005**
- **Lubrication and Tribology Testing Workshop, STLE, 2006**
- **Corrosion Detection, Prevention and Control Workshop, NACE, 2009**
- **Certified Lubricant Specialist, Society of Tribology and Lubricant Engineers (STLE), 2012-2019**

Employment

2006 to Present

President and Chief Technical Officer, DVI Aviation Inc., Bolingbrook, IL

Mr. Meyers is responsible for all facets of operating DVI Aviation, and over his 23+ career in the Aerospace and Defense industries, he has conducted several hundred failure analysis and aircraft accident investigations. His experiences include airframe and powerplant system design and interface issues, flight and ground testing, human factor analysis of both flight and maintenance operations, and the evaluation of material wear and lubrication (tribology). These investigations have involved complex accident reconstructions, the development of unique/customized test procedures, and interdisciplinary expertise. He also developed and conducts *Human Factors* based flight reviews and ground school training. These in-depth instructional programs cover cockpit leadership techniques, error management, risk management, human factors, single pilot

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

resource management, and expert based scenario training. Other aviation services include aircraft specific checkouts, flight department audits, safety seminars, and aircraft maintenance.

2009 to Present

Adjunct Faculty Instructor, Lewis University Aviation Department, Romeoville, IL

Lewis University is an FAA approved Part 141 Flight Training provider and FAA approved Part 147 Aviation Maintenance Technician School (AMTS). Mr. Meyers developed and instructs courses in *Applied Aircraft Investigation Techniques, Aviation Human Factors-Flight, and Human Factors in Aviation Maintenance*. These advanced level courses cover: the investigation process, Pilot errors, maintenance errors, material science, failure analysis, understanding the relationship of the person-machine-environment, and how to apply scientific methodologies. Additionally, Mr. Meyers serves as an FAA designated DME for Lewis University's AMTS training program.

2005 to 2012

Vice President, Institute of Tribology and Coatings (ITC & ITC Experts), Sugar Grove, IL

ITC is a Not-For-Profit research and development organization that advances the utilization of tribological and advanced materials to reduce friction, wear, corrosion, and failures of military equipment operating in Iraq and Afghanistan. Mr. Meyers evaluated the mechanical failures of equipment and components from a broad cross-section of the military ranging: from small arms, to large bore cannons, to helicopters, to vehicles, to missile systems, to tracked vehicles, to evaluating the failure of the coatings on the bottom of the NSF's ski equipped LC-130 cargo aircraft. He developed modified ASTM methods for measuring abrasive and adhesive wear, developed sensors for measuring frictional energy in weapon systems, evaluated the performance of lubricants under extreme conditions, and developed blast resistant composite materials. ITC Experts is a For-Profit failure analysis and multi-disciplinary accident investigation consulting firm.

2000-2005

Director of Aerospace, Packer Engineering Inc, Naperville, IL

Packer Engineering is a nationally recognized multi-disciplinary engineering firm, and maintained extensive chemical, metallurgical, and mechanical testing laboratories. Mr. Meyers consulted on many aspects pertaining to aircraft accident investigations, wreckage reconstruction, and the failure of aircraft components, ground vehicles, and support equipment. Mr. Meyers was also the Program Manager of a research program funded by U.S. Special Operations Command (SOCOM) to evaluate the structural failures of Navy SEAL watercraft and to develop replacement composite structures. He was also the Co-Program Manager for a research program, funded by the Office of Naval Research (ONR) in partnership with Boeing, to develop methods for the intelligent processing of advanced composite structures.

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

1994-2001

Non-Commissioned Intelligence Officer, USAF-ANG, 126th Air Refueling Wing, Chicago, IL
Mr. Meyers's responsibilities included planning, organizing, and managing unit intelligence mobility capabilities for possible deployment. Knowledgeable about the principles, practices and procedures of operational intelligence activities involving the application of intelligence information in direct support of combat flying operations. Knowledgeable of the techniques and procedures for collecting, researching, evaluating, analyzing, exploiting, and disseminating all source intelligence information. Knowledgeable of the intelligence reference libraries, capabilities of enemy offensive and defensive weapons systems, including the geographical, political, psychological, and military aspects of United States, allied, and foreign countries. Participated in the Bosnian and Kosovo Peace Keeping Efforts.

1998-2000

Project Engineer, Flight Visions Inc, Sugar Grove, IL
Flight Visions designed and manufactured Heads-Up-Displays and weapon delivery systems for transport and fighter aircraft. Mr. Meyers contributed technical expertise to a wide variety of airframe applications, including Boeing-Aerovodochy (L-139/159), Lockheed-Martin (F-35 JSF, C-130AMP), Northrop Grumman (F-14B), Israeli Aircraft Industries (KFIR), and Pilatus (PC-9).

1999-2000

Flight Instructor, Lumanair, Sugar Grove, IL
Lumanair is a 40+ year old fixed based operator with flight training and charter services. Mr. Meyers provided primary and advanced flight instruction, flight reviews, and aircraft checkouts.

1998

Intern and Project Engineer, Frasca Flight Simulators International, Champaign-Urbana, IL
Frasca manufactures flight training equipment for airlines, flight schools and military organizations worldwide. Mr. Meyers contributed technical expertise to both civilian and military applications.

1993-1997

Apprentice Aircraft Mechanic / Lineman, A&M Aviation, Bolingbrook, IL
Performed routine maintenance on General Aviation and Business aircraft, and responsible for refueling and positioning of aircraft.

Leadership **Board, Officer, and Committee Experience**

2018 to Present	Founder and Chairman of the Board, DVI Forensic Laboratories, LLC.
2006 to Present	Founder and Chairman of the Board, DVI Aviation. Inc.

Mr. Steven J. Meyers
Air Safety Consultant
President and Chief Technical Officer

2013 to 2016	Laboratory Technician Subject Matter Expert on the DACUM Advisory Board for Laboratory Curriculum Development at Waubensee Community College
2011 to 2012	Aircraft Accident Investigator Subject Matter Expert on the FAA General Aviation Joint Steering Committee, Loss of Control Working Group
2011	Technical R&D Proposal Reviewer, U.S. Army, Joint Services Small Arms Program Office, Materials Processing Committee
2006 to 2012	Board of Director, Illinois Aviation Museum
2008 to 2009	Waubensee Community College Manufacturing-Industrial Advisory Board
2003 to 2005	Board of Director and President, Packer Wings NFP
2004	In-situ Board Member, Aviation Professional Educational Center
